Black Hawk pilot returns to LMS from year's deployment

After 12 months of flying medical evacuation missions across the Middle East with the Vermont National Guard, Chief Warrant Officer 3 and Black Hawk helicopter pilot Adam Truso has returned to his full-time civilian job as a member of the Business Development team at LMS.

Adam serves with Vermont National Guard's Charlie Company, 3rd Battalion, and 126th Aviation Regiment. Charlie Company joined with soldiers from the National Guard, Reserve and active duty Army to support Operation Inherent Resolve.

Adam says it's great to be home with his family, and he's gradually easing into civilian life again. He added, "I'm also excited to see how much new business LMS' growth initiatives have generated over the past 12 months, with new development contracts underway and more on the horizon. I'm eager to get back to work and reconnect with our friends and customers."

LMS featured on Manufacturing Marvels

LMS was selected to be shown on the Fox Business Network's "Manufacturing Marvels" to showcase our expertise in the design and manufacturing for carbon composite fuel gauging probes, signal conditioners and indicators.
