Re: LMS Promotes Three in Leadership

LMS Announces 3 Top Leadership Moves Maguire becomes General Counsel & Strategic Initiatives Director; Corrigan & Pickering promoted to top Technology & Engineering posts

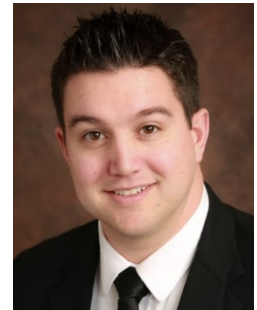

(GEORGIA, VT – 3 May 2021) – Aerospace company Liquid Measurement Systems, Inc. announced that Gregory Maguire has assumed the role of General Counsel and Director of Strategic Initiatives, effective today. He will be responsible for growing LMS' business relationships across all business sectors, as well as serving as the Company's chief legal officer.

Maguire came to LMS from Revision Military in 2018 as Director of Government & Legal Affairs.

In January 2021, the Company also promoted Jason Corrigan to the newly created role of Director of Engineering, and Steven Pickering to Director of Technology.

Corrigan came to the Company from United Technologies Aerospace Systems (now Collins Aerospace) as a Software Engineer in 2017 and became Manager of Engineering in 2018. Pickering worked for GE Aviation and Ametek Aerospace & Defense before joining LMS in 2019 as a Senior Project Engineer. Both joined the Company's leadership team in January.

LMS President Scott Fewell says the Company is doubling down on executing its business strategy. "We are expanding our products and capabilities, as well as our markets and business models. Greg's new and expanded role will allow us to fully leverage his wide-ranging skillset and commitment to LMS. The appointments of Steve and Jason reinforce LMS's commitment to technological innovation and leadership. Their combined industry experience and expertise provides a solid foundation for developing and deploying new technology solutions across new frontiers for our business."
